

**ICA MAXI** is Sweden's largest supermarket with 1300 supermarkets.

Managers are positive towards our new innovation LED panels. This super slim elegant panel gives more LUX and consumes less electricity than old florescent tube. It gets the products shine up clear with natural colors. The panel size is 300 mm wide, 1600 mm long, 12 mm highs with 100 watt led and 10.000 lumen. This panel color can change from 2500k – 6000 kelvin from warmer to cooler light with simple touch on the remote control. You will also have dimmable function with remote control. Diode International is the first company in the world given supermarket option to select light they want with the touch of a button.
